

Quality Policy

SINAI WHITE CEMENT is an integrated solutions provider undertakes to develop and deliver high quality **White Cement**, according to the purpose of context of **SINAI WHITE CEMENT** and its strategic direction, that will be by:

- 1- Complying with International and Local Standards Requirements
- 2- Complying with all applicable Customers & Regulatory Requirements and the external providers
- 3- Maintaining and continually improving the effectiveness of quality management system
- 4- The company complies with the legal requirements and the other requirements

To reach these goals, the company pursued a scientific approach through the development of Quality Management System consistent with the requirements of standard specifications **ISO 9001:2015** in terms of coordinating work, raising efficiency, the provision of human and technical resources, and training systems necessary to achieve the development and continuous improvement of the product quality.

The company developed targets to measure the process effectiveness of Quality management system to be reviewed and updated annually with the Policy to ensure the professionalism of the operations implementation for customers as a result of accurate and long experience of the company in the field of white cement manufacturing creating a suitable environment for the development and achievement of quality objectives according to the context of the organization and its strategic direction.

So, **SINAI WHITE CEMENT** top management asks all employees to apply the Quality Management System in all manufacturing activities as well as to develop good performance and continual improvement of quality and put the full customer satisfaction in mind and make every effort to achieve **SINAI WHITE CEMENT** objectives.
